

## BC Kidney Days 2014

BC Kidney Days 2014 was a resounding success, attracting over 530 delegates. Most were from BC, but over 55 attended from other parts of Canada and several came from the US and Australia.

A new feature of the conference this year was TED Talk-style presentations on medical apps and kidney care research. Feedback on this format, which includes shorter, focused talks without a podium, was very positive. If you missed these sessions or any of the other plenaries, they will soon be available for download in video format from the BCKD website. You can also review the PowerPoint slide presentations for all sessions [here](#).

In addition to plenary and concurrent presentations, BCKD also provides an opportunity for knowledge sharing through [posters](#) that highlight research and quality initiatives across the province.

If you attended BCKD, please share your feedback through our [online evaluation survey](#), so we can continue to improve the event. The survey closes November 6<sup>th</sup>.

And finally, it's never too early to save the date for next year's conference, which takes place October 1-2 at Renaissance Harbourside Vancouver. We hope to see you there.
