

New look for PROMIS

PROMIS users will soon notice a big difference in the look and feel of the BC Renal Agency's patient database. The initial launch of the system's new "Patient View" is set for July 28.

The Patient View will introduce several new features, including an easier way to search for patients, a consolidated view of patient information, and easier navigation to other parts of the patient's PROMIS record.

Since this release features new screens and navigation options, training is recommended, and is available in two formats: webinars facilitated by PROMIS trainers, and an online course for independent, self-paced learning. Training begins in mid-July and registration for the webinars is now available on <https://ccrs.vch.ca>. Simply type in PROMIS Patient View in the Course Search function.
